DETAILED ACTION

1. This application is in condition for allowance except for the following formal matters:

Figure 1 is objected to because empty diagram boxes are impermissible under 37 CFR §1.83(a) that recites as follows:

“The drawing in a nonprovisional application must show every feature of the invention specified in the claims. However, conventional features disclosed in the description and claims, where their detailed illustration is not essential for a proper understanding of the invention, should be illustrated in the drawing in the form of a graphical drawing symbol or a **labeled** representation (e.g., a **labeled** rectangular box).”
(Emphasis added by Examiner)

The empty diagram boxes found in Figure 1 of the drawings must be labeled with an appropriate descriptive phrase in addition to the reference legend already present. Appropriate correction is required.

Replacement drawing sheets including the correction are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Figure 3 of the drawings objected to because its axes are not labeled in English. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement

drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 25 USPQ 74, 453 O.G. 213, (Comm'r Pat. 1935).

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Allowable Subject Matter

2. The following is a statement of reasons for the indication of allowable subject matter for claims 10-20: In the claims as claimed, the prior art fails to show or fairly

suggest a method for determining a rotor position of a synchronous motor wherein an amount of current vector necessary to attain a defined deflection of the rotor is determined. Methods of determining angular position of the rotor in a synchronous motor are well known in the art, however, determining the deflection of the rotor in the method as claimed is novel and nonobvious.

In addition, the International Preliminary Examination Report cites a document that it considers to be most relevant to the disclosure of the instant application. The title of the document is "A Procedure to Estimate the Absolute Position of the Rotor Flux of a Permanent Magnet Synchronous Machine" from the European Conference on Power Electronics & Applications, 1991, Backhaus; Reinold; Kalker. After reviewing this document, it is not considered to be defeating prior art.
